Introduction	8
1. SAP HANA Cloud Overview	10
1.1. In this chapter	10
1.2. Overview	11
1.3. Database services	14
1.4. Application Development	17
1.5. Data Virtualization	19
1.6. SAP HANA Cloud Vs On-Premise	20
1.7. Business Technology Platform (BTP)	22
1.8. Resources	26
2. HANA Cloud Initial Set Up	27
2.1. In this chapter	27
2.2. SAP HANA Cloud Database provisioning	28
2.3. SAP Business Application Studio (BTP) set up	33
2.4. Building a database project from SAP BAS	40
2.5. File explorer and Git configuration	46
2.5.1. Design-time objects	46
2.5.2. Runtime objects	49
2.5.3. Deleting a project	50
2.5.4. Initializing the Git repository	51
2.5.5. Clone a Git Repository (optional)	55
2.5.6. CI/CD service (optional)	58
2.6. Resources	66
3. HANA Modeling Concepts	67
3.1. In this chapter	67
3.2. Data Model overview	68
3.3. Entity-Relationship Model	70
3.4. Normalization	73
3.5. HANA Cloud modeling concepts	76
3.5.1. Tables	76
3.5.2. Views	77
3.5.2.1. SQL View	77
3.5.2.2. Basic Joins	78
3.5.2.3. HANA Joins	79
3.5.3. Cube	79
3.5.4. Graphical Calculation Views	80
3.5.5. Core Data Services (CDS)	81
3.5.6. HANA Cloud Artifact List	82
3.6. Conversion of the ERM to a database design	84
3.6.1. HANA Data types	85
3.6.2. Customers table	89
3.6.3. Employees table	90
3.6.4. Orders table	91

3.6.5.	Order Details table	92
3.6.6.	Products table	93
3.6.7.	Categories table	94
3.6.8.	Product Vendors table	94
3.6.9.	Vendors table	95
3.6.10.	GitHub Synchronization	96
3.7.	Resources	99
4.	HANA Cloud Data Model Deployment	100
4.1.	In this chapter	100
4.2.	Deploying the data model	101
4.3.	Loading the tables	104
4.4.	SAP HDI infrastructure	107
4.4.1.	XS classic	107
4.4.2.	XS Advanced	108
4.4.3.	HANA Cloud	109
4.4.4.	SAP HDI Containers	110
4.5.	Resources	116
5.	HANA Cloud Development	117
5.1.	In this chapter	117
5.2.	SAP HANA in the CF environment	118
5.3.	SAP HANA SQLScript basics	121
5.3.1.	SQLScript Basic programming elements	121
5.3.2.	Anonymous block	127
5.3.3.	User -defined functions (UDF)	128
5.3.4.	Procedures	129
5.3.5.	Naming convention for SQLScript	130
5.4.	Information Views	131
5.4.2.	Business question # 1	132
5.4.2.1.	Customers dimension	133
5.4.2.2.	Products dimension	146
5.4.2.3.	Orders fact table	150
5.4.2.	Business question # 2	162
5.4.2.1.	Employees dimension	163
5.4.2.2.	Function table for employees table	165
5.4.2.3.	Products vendors dimension	172
5.4.2.4.	Function table for products and vendors tables	173
5.4.2.5.	Orders fact table	181
5.5.	Time Dimension (optional)	197
5.6.	Resources	201
6.	SAP Data Intelligence	202
6.1.	In this chapter	202
6.2.	SAP Data Intelligence overview	203
6.2.1.	Introduction	203
6.2.2.	SAP Data Intelligence trial	204
6.3.	Launchpad	210
6.4.	Connection Management	212
6.5.	Monitoring	214
6.6.	Metadata Explorer	217
6.6.1.	Catalog	218
6.6.2.	Rules	220
6.6.3.	Business Glossary	221
6.6.4.	Monitor	221
6.6.5.	User Preferences	222
6.6.6.	Administration	222
6.7.	System Management	223

6.8.	ML Scenario Manager	227
6.9.	Modeler	229
6.10.	HANA Cloud Connection	232
6.11.	VCTL tool (optional)	239
6.12.	Data science using SAP DI	241
6.12.1.	Business Understanding	244
6.12.2.	Data Understanding	246
6.12.3.	Data Preparation	252
6.12.4.	Modeling	255
6.12.5.	Evaluation	266
6.12.6.	Deployment	275
6.13.	Resources	285
